

## LINEARlight Colourmix Flex

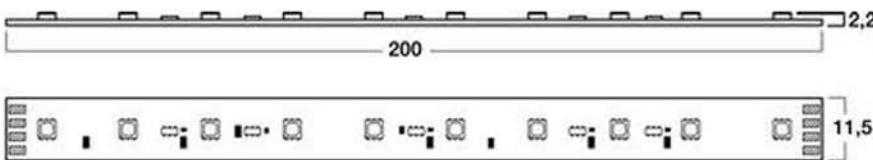

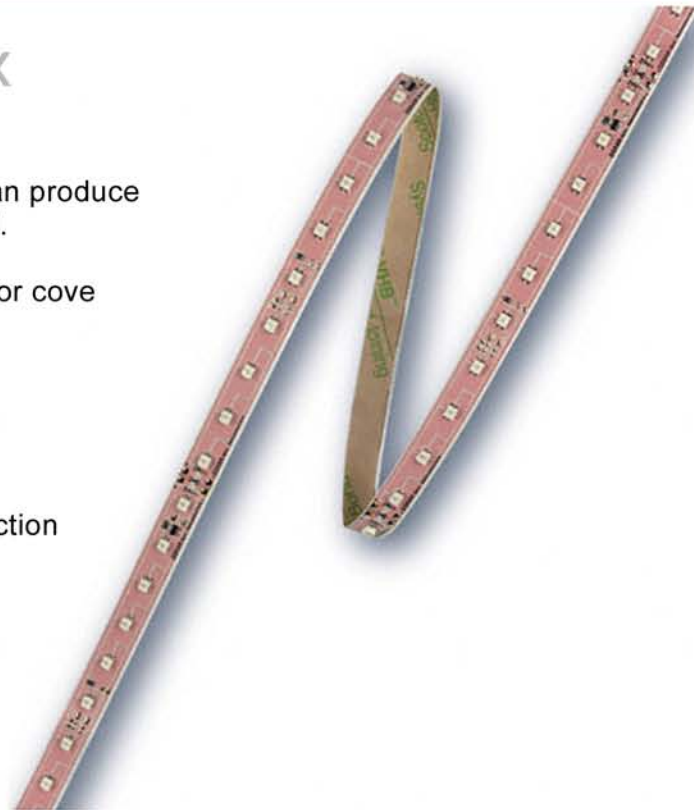

The LINEARlight Colourmix Flex is a flexible LED strip that can produce stunning RGB colour applications on a paper thin pcb material. Each strip consists of 200 LED modules each with 3 coloured dies (Red, Green and Blue). This LED Strip would be perfect for cover or other forms of architectural lighting.

Dimensions of Strip: 4000mm x 11.5mm x 2.2mm

Dimensions of cutting length: 200mm x 11.5mm x 2.2mm

Can easily be divided into 10 LED sections with no loss of function

The modules can be controlled using OSRAM OPTOTRONIC electronic control gear.

Colour	Number of LEDs	Wavelength	Beam Angle	Voltage	Current	Power
Red	200	617	120	24	0.5	12
Green	200	525	120	24	1	24
Blue	200	473	120	24	0.8	19.2
