SLIMLIGHT

SLIMLIGHT

LED Solutions' stylish, ultra slim light boxes are the ideal way to enhance promotional posters and graphics. The slim profile light boxes are a new concept for displaying images and are an ideal lightweight solution for retail displays.

Most backlit light box systems have row after row of T5 or T4 fluorescent tubes. To enable our light boxes to be so slim we use the latest technology; pencil thin fluorescent tube and gear, which illuminate either side of an acrylic back panel giving a bright and even light distribution. All of LED Solutions' poster display range is CE certified. Three of our designs use OSRAM tubes and gear for A0-A2 sizes.

Our cases come in the following designs

Slimlight Profile
